CHAPTER - 1

INTRODUCTION

Happiness and unending fulfilment of the soul have been the goals of humanity from time immemorial. Over the past few decades, human society has advanced in leaps and bounds in terms of technological wizardry and multi-facilities lifestyle in their quest for happiness. With all the latest technology available at the disposal, our society appear to be advancing in the right direction subsequently helping us get a feeling of "Hum Honge kamyab Ek Din."

Right from the dawn of Human Civilization, the importance of Value Education has been realized and emphasized time and again by pioneers and thinkers all over the world. Intellectual education touches the head and value based education influences the heart. Thus, there is a need of imparting a perfect blend of knowledge, skills and values in order to proliferate

the rate of growth and development of an individual. Along with knowledge, youths must be empowered with wisdom in order to help them embark on the path of holistic development. Moreover, in order to nourish them in their sapling stage, along with education we must bless them with much needed support and a favourable ambience. This is of topmost importance.

When the above mentioned formula is followed, a human being moves towards becoming a civilized human being who believes in the formula of sharing and caring although this is not easy. Therefore, for sharing and caring, one has to be daring. A civilized human being turns competition into contribution eventually turning everything into celebration. Therefore, it is said" An

un-educated heart competes, a half-educated heart cooperates, but an enlightened heart serves." This is the actual aim of education and human development.

With this vision in mind while being overwhelmed by the desire of "Let's Make People Better," a group of thoughtful intellectuals has come up with the idea of Ethiccraft Club. The purpose of this wing of hard working and selfless youths is to help the society take a stride forward towards cultivating the inherent goodness of the heart and

become instrumental in spreading the principles of peace, harmony, love, care and compassion which form the foundation of human society. Human values are like the foundation of human personality and must be given necessary priorities especially among the youth and children all across the globe.

When a mission is undertaken with the sincere desire of helping the society which is currently being tormented by all kinds of problems including suicides, drug addiction, juvenile delinquency etc. due to degradation of moral values and ethics, then the Almighty Lord showers his blessings and these blessings become the intangible currency which help one procure the ingredients for success. With this positive note, let us all become instrumental in exhibiting that vigour, enthusiasm and determination which even has the potential to melt the rocks. When a combination of youths come together with this desire, the vision to make world a beautiful place to live remains no more a distant dream.

CLUB MEMBERSHIP STANDARDS

Get Involved

Albert Einstein Said, 'Life is like riding a bicycle; to keep the balance one has to keep moving.' For most people, there is no time to stop to learn how to maintain good relationships, how to become effective leaders, how to manage complications in life, and so on and so forth. They are always on the bicycle of life. Thus, they actually go through life while caring very little for growing through life. Growing through life happens by learning and this learning facilitates the holistic growth of the individual and society. Thus, any effort to help retain the balance is always welcome.

In this direction, the role of youths is of topmost importance. Youths possesses that energy and potential to work out an extra edge as compared to other age groups. This gives leaders a great opportunity to effectively utilize young lads to empower country towards success. This opportunity can be capitalized if the powers of the youth is harnessed properly. Just as when the atomic energy is harnessed properly, it can resolve all energy related issues within the country. Similarly, if the youth energy is harnessed properly we can't even imagine the outcome it can bring. Therefore, it is very important to realize the youth power and utilize it effectively. All we need is to direct the energy of our youth in constructive channels that lead to development and progress.

CURRICULUM

6.1 Introduction

The whole enterprise of education is strongly linked with the development of values. Devoid of the potential to nurture values, education losses its heart and soul. No one who attempts to depict the spirit of age in which we live can possibly neglect the importance of education for values for an all-round, harmonious growth of the society. Peace and security are facing new challenges that could have negative implications if we do not address them positively. The youth period which is normally spent in schools and colleges are crucial. Whatever is learnt and imbibed will determine to how students would live out their lives in future. The concern about value degradation is not new to this era. Even before independence such concern was pronounced in policy documents. Policy makers and educators have all along seriously and deeply pondered on this concern and have been trying to discern the potential of schooling, pinning their hopes on education to fulfil the aspirations and expectations of the public and the society.

Responding to this urgent need, Ethicraft Club has brought out framework for schools and colleges on Education of values which articulates a comprehensive and pragmatic approach to value education among youth. The framework has been written in response to the needs, interests expressed by academics and public alike across the country. It includes vision, expectations, strategies and benchmarks for implementation and assessment of value education in the younger generation. The framework is suggestive and not prescriptive to allow scope to customize the same suited to the varied needs, contexts and resource of the schools.

Grounded on a holistic framework, it makes striking attempts to relate to the contemporary issues and realities. It offers precisely the kind of reflection that is required for a subject like value education. The framework therefore requires careful and detailed reading of the text, commitment and persistent efforts, special inputs and concrete actions to build upon or reorienting existing practices. I do hope that youth practitioners will find this framework informative and thought provoking.
